

# Threats to Watersheds

## Crossword Puzzle

### Down:

1. The variety of living things in a given place—whether a small stream, an extensive desert, all the forests in the world, the oceans, or the entire planet.
2. Used to protect natural areas from ungulates. You might have one of these in your yard as well.
3. Hooved animal that causes damage in Hawai'i's forests by injuring plants, eating fruit, and rooting around.
4. First peoples to discover the Hawaiian islands around the year 400.
6. Species that arrived here without the help of humans.
8. A tree that helps build forests, collect water, provides habitat for other plants and animals, and is important to the Hawaiian

### Across:

5. Species that arrived here with the help of humans.
7. This happens when rocks and sediments are picked up and moved to another place by ice, water, wind or gravity.
9. Organisms that are non-native that harm our health, environment, economy, or quality of life.
10. Disease spread by mosquitoes that can affect humans and birds.
