

Watershed

Crossword Puzzle

Down:

1. Area of land, such as a mountain or valley, which collects rainwater into a common outlet.
2. When water turns into vapor.
5. The study of the shape and features of land surfaces.
8. Open space in the ground where water is stored.
9. Layer that catches most of the raindrops and water flows down the branches, to its trunk and to the ground.

Across:

3. Spongy plant that is found in the ground cover layer.
4. One of the most prevalent trees in Hawai'i's forests. Helps to filter out sunlight and is found in the canopy layer.
6. Darkest part of the forest that does the least amount of evaporation and evapotranspiration.
7. This is one of the tallest in the forest. They are the first to slow down the rain, protecting the layer below. Found in the emergent level of the forest.
10. _____ Forests = Clean water (fill in the blank)
